

CLIFF NYENDWE ESISARI

DATA ANALYST | BUSINESS INTELLIGENCE | SQL | POWER BI | EXCEL | PYTHON | DATA AUTOMATION

Nairobi, Kenya | +254 729 850 406 | cliffyendwe2018@gmail.com | LinkedIn

PROFESSIONAL SUMMARY

Data Analyst and Business Intelligence professional with 5+ years of experience analysing large business, customer, sales, operational, and transactional datasets across ERP, CRM, and integrated business systems. Strong expertise in Advanced Excel, SQL, Power BI, Power Query, Python and Pandas, with hands-on experience extracting, transforming, validating, reconciling and analysing data from multiple sources.

Experienced in developing analytical datasets, KPI dashboards, management reports, performance scorecards and automated reporting processes to support operational and management decision-making. Strong background in trend analysis, variance analysis, exception investigation, forecasting, data-quality assurance and reconciliation.

Experienced in working with large and complex datasets, investigating anomalies and discrepancies, identifying performance gaps, improving reporting accuracy, and automating recurring analytical processes. Comfortable translating business requirements into practical analytical solutions and communicating findings clearly to technical and non-technical stakeholders.

Strong technical background spanning SQL-based data extraction, Power BI and DAX, Excel modelling, Python/Pandas analytics, ETL/ELT, data integration, APIs, data validation, reporting automation, testing, and business-system support.

CORE SKILLS

Data Analysis: Trend Analysis | Variance Analysis | Forecasting | Exception Analysis | KPI Analysis | Performance Monitoring | Comparative Analysis | Statistical Analysis

Data & Reporting: Advanced Excel | SQL | Power BI | DAX | Power Query | KPI Dashboards | Management Reporting | Performance Scorecards | Ad-Hoc Reporting | Automated Reporting

Data Quality & Reconciliation: Data Validation | Data Cleaning | Data Reconciliation | Data Auditing | Anomaly Investigation | Duplicate Identification | Data Standardisation | Data Quality Assurance

Automation & Analytics: Python | Pandas | NumPy | ETL/ELT | Data Transformation | Reporting Automation | Analytical Datasets | Data Modelling

Business Systems: ERP | CRM | Transactional Systems | Operational Systems | Data Integration | REST APIs | Business Applications

Stakeholder & Process Support: Requirements Gathering | Business Process Analysis | Issue Resolution | UAT | Testing | Documentation | Stakeholder Communication | Continuous Improvement

PROFESSIONAL EXPERIENCE

FREELANCE - COMMERCIAL DATA ANALYST & BUSINESS INTELLIGENCE CONSULTANT

Nairobi, Kenya | June 2026 – Present

- Analyse customer, sales, revenue, business, and operational datasets to support performance monitoring and management decision-making.
- Analyse historical and current data to identify trends, patterns, variances, exceptions and performance gaps requiring management attention.
- Monitor commercial and operational KPIs and investigate significant changes and performance deviations.
- Conduct comparative and historical analysis to support planning, forecasting and identification of emerging trends.
- Develop Power BI dashboards, KPI scorecards and management reports for performance monitoring.
- Extract, consolidate, clean, validate and reconcile data from multiple business and operational sources.
- Investigate discrepancies, anomalies, incomplete records and inconsistencies across datasets and identify underlying causes.

- Apply data transformation, standardisation and quality-control techniques to improve data reliability.
- Use Advanced Excel, SQL, Power BI, Power Query, Python and Pandas to extract, transform, analyse and visualise business data.
- Develop reusable analytical datasets and reporting templates supporting recurring and ad-hoc analysis.
- Automate recurring reporting and data-preparation activities to improve reporting timeliness and reduce manual effort.
- Identify opportunities to improve data workflows, reporting processes and operational information management.
- Work with business, operational and technical stakeholders to understand analytical and reporting requirements.
- Communicate analytical findings, data-quality issues, trends and recommendations clearly to stakeholders.

SAMASOURCE - BUSINESS INTELLIGENCE ANALYST | PROCESS ANALYST

Nairobi, Kenya | March 2022 – May 2026

- Analysed large and complex customer, sales, operational, and business datasets to support business operations and management decision-making.
- Worked with data originating from CRM, ERP, operational and reporting systems.
- Analysed business performance to identify trends, patterns, exceptions, variances and performance gaps.
- Conducted historical and comparative analysis to identify changes requiring corrective or operational action.
- Monitored KPIs and performance measures and highlighted significant changes and exceptions for management attention.

- Supported forecasting and forward-looking analysis using historical and current business data.
- Prepared recurring and ad-hoc analytical reports, performance summaries, business reviews and stakeholder presentations.
- Extracted and transformed transactional and operational information from ERP and CRM environments using SQL and other analytical tools.
- Reconciled information across CRM, ERP and operational sources to establish reliable analytical datasets.
- Investigated inconsistencies between business systems, source data and reporting outputs.
- Supported standardisation of business information, reporting definitions and analytical methodologies.
- Analysed customer and sales information to identify patterns, exceptions and performance opportunities.
- Designed and developed interactive Power BI dashboards and KPI scorecards for business performance monitoring.
- Built DAX measures, Power Query transformations and analytical data models for reporting requirements.
- Used SQL to extract, filter, join, aggregate, reconcile, and transform business data.
- Developed reusable analytical datasets supporting scalable and repeatable reporting.
- Prepared management-ready insights and recommendations based on operational and commercial analysis.
- Automated recurring reporting processes using Excel, SQL, Power Query and Power BI.
- Conducted structured data validation, quality assurance, auditing and reconciliation across multiple business systems.

- Identified inaccurate, incomplete, inconsistent and duplicate records and investigated underlying causes.
- Maintained documentation covering data definitions, reporting processes, business rules, methodologies and data-management procedures.
- Identified repetitive reporting and data-management activities suitable for automation and implemented practical improvements.
- Developed and supported Power Apps-based solutions for structured data capture, information management and reporting.
- Managed data, application and reporting issues through ServiceNow and Jira, maintaining ownership through investigation and resolution.
- Worked with business and technical stakeholders to gather requirements and translate them into dashboards, reports, datasets and analytical solutions.
- Supported solution design, development, testing, User Acceptance Testing, implementation and post-implementation improvement.
- Provided user support, training and documentation for BI, reporting and data-management solutions.

Selected Achievements

- Developed interactive Power BI dashboards and KPI scorecards improving visibility of business performance and exceptions.
- Automated recurring reporting processes, reducing repetitive manual activities and improving reporting timeliness.
- Improved data reliability through structured validation, reconciliation, and quality-control procedures.
- Standardised reporting definitions, templates and analytical methodologies across multiple reporting requirements.
- Developed reusable analytical datasets supporting scalable reporting requirements.

WORKFLEEK TECHNOLOGIES — DATA ANALYST | DATA ENGINEER

Nairobi, Kenya | January 2021 – December 2021

- Developed SQL-based analytical solutions supporting business and operational reporting.
- Extracted, transformed, cleaned, and validated data from multiple business systems.
- Analysed ERP and business-system data to support reporting and data-integration initiatives.
- Integrated information from multiple systems and sources into structured analytical datasets.
- Built ETL workflows integrating REST API data into structured analytical datasets.
- Used Python and Pandas for data cleaning, transformation, and preparation.
- Used SQLite and BigQuery for structured data storage, querying, and analytical workloads.
- Supported data-warehouse reporting using Amazon Redshift.
- Developed SQL queries for data extraction, transformation, reconciliation, and analysis.
- Conducted data-quality checks, reconciliation, and anomaly investigation.
- Investigated source-data inconsistencies and supported corrective actions.
- Supported data modelling and preparation of datasets for downstream reporting and analysis.
- Worked with REST APIs and backend data services to support information integration.
- Supported production data workflows, troubleshooting data issues through investigation and resolution.

UBUNIFU COLLEGE - SOFTWARE DEVELOPER | TECHNICAL INSTRUCTOR

Nairobi, Kenya | January 2020 – December 2020

- Delivered practical training in Excel, data analytics, Python, SQL, databases, ETL and Business Intelligence.
- Designed analytical exercises, dashboards, presentations and instructional resources.
- Guided learners through data preparation, validation, transformation, analysis, visualisation and reporting.
- Designed exercises covering SQL querying, database design, data transformation and analytical workflows.
- Supported requirements gathering, solution development, testing and documentation.
- Provided troubleshooting and user support for programming, databases and analytical projects.
- Communicated technical concepts clearly to technical and non-technical users.

BRAINVERSE TECHNOLOGY - SOFTWARE DEVELOPER

Nairobi, Kenya | May 2019 – December 2019

- Supported software development projects covering requirements gathering, development, testing, documentation, and implementation.
- Worked with SQL, databases, and APIs in application development and data-related tasks.
- Supported clarification of user requirements for application and database-related projects.
- Developed technical and user-oriented documentation.
- Supported troubleshooting and resolution of application and database issues.

- Supported testing, implementation, and post-implementation issue resolution.

TECHNICAL SKILLS

Advanced Excel: PivotTables | Lookup Functions | INDEX/MATCH | Data Validation | Power Query | Spreadsheet Modelling | Automated Reporting

Business Intelligence: Power BI | Power BI Service | DAX | Power Query | KPI Dashboards | Performance Scorecards | Management Reporting | Data Visualisation

Data Analysis: SQL | Python | Pandas | NumPy | Trend Analysis | Variance Analysis | Forecasting | Exception Analysis | Statistical Analysis

Data Engineering: ETL/ELT | Data Ingestion | Data Transformation | Data Modelling | REST APIs | API Integration | Data Workflows

Databases & Warehousing: BigQuery | SQLite | Amazon Redshift | Relational Databases | Data Warehousing

Business Systems: ERP | CRM | Integrated Business Systems | Transactional Data | Customer Data | Sales Data | Operational Data

Tools: ServiceNow | Jira | GitHub Actions | Power Apps

EDUCATION & PROFESSIONAL DEVELOPMENT

MORINGA SCHOOL

Software Development Bootcamp | Nairobi, Kenya | 2018 – 2019

Relevant areas: Software Development | SQL & Database Design | Python Programming | Data Structures | APIs | Agile Development Practices | Web Applications

ADDITIONAL STRENGTHS

- Strong analytical and problem-solving capability.
- Advanced Excel and SQL capability.

- Strong Power BI dashboard development experience.
- Experienced working with ERP and CRM data.
- Strong data-quality, validation, and reconciliation mindset.
- Strong trend, variance, and exception-analysis capability.
- Experienced in identifying patterns, anomalies and operational performance gaps.
- Strong attention to data accuracy, completeness, consistency and timeliness.
- Strong process-improvement and reporting-automation mindset.
- Experienced working with technical and non-technical stakeholders.
- Strong documentation, reporting and presentation skills.
- Experienced in requirements gathering, testing, and UAT.
- Production troubleshooting and issue ownership.
- Ability to work independently and collaboratively.
